

Eiger Jump: See the North Face

If you're after the most scenic, most thrilling skydive in the Alps, the Eiger Jump is it. This is the kind of experience you'll talk about for the rest of your life.

It all starts with a helicopter flight that's a highlight on its own—leaving the Lauterbrunnen Valley, past the Jungfrauoch and circling legendary Eiger North Face, before returning to hover over Lauterbrunnen.

Then comes the jump. At 14,500 feet (4,300 meters), the door opens. You step out, take in the mountains around you—and go. The 40-45 second freefall takes you past glaciers and peaks at up to 200km/h, and once the parachute opens, you'll float back down through one of the most beautiful places on Earth.

This isn't just a skydive. It's a full-on alpine adventure, and there's nothing else quite like it.
